Objective

Aspiring Software Engineer and recent B.Tech graduate with strong analytical and problem-solving abilities, intermediate proficiency in Data Structures & Algorithms, Eager to contribute to the design and development of efficient, scalable, and reliable software systems.

EDUCATION

Bachelor of Technology in Artificial Intelligence & Data Science **2022-2026**
Guru Nanak Institutions Technical Campus, Hyderabad, India
CGPA:- 8.64

Central Board of Secondary Education (CBSE) – Class XII **2021-2022**
Sai Spurthi DAV School, Sathupally, India
MPC, Percentage:- 91%

Central Board of Secondary Education (CBSE) – Class X **2019-2020**
Sai Spurthi DAV School, Sathupally, India
Percentage:- 95%

SKILLS

Programming Languages:	Java, Python, Javascript(working knowledge)
Backend technologies:	Node.js, Express.js, REST API's
Developer Tools:	VS Code, Postman
Database:	MYSQL, MongoDB
CS Fundamentals:	Data Structures and Algorithms (Arrays, Strings, Hashing, Two Pointers, Recursion), Time and Space Complexity.

INTERNSHIP EXPERIENCE

Intern at EY Global Delivery Services & AICTE **Feb 2025 - Mar 2025**

- Worked on building modern applications with MERN stack
- Developed an application PRO-MAN for project management tasks that include managing the teams, alerts about the project deadlines, budget analysis etc..
- Implemented interactive features like responsive webpages, better user interface, widgets and key tabs.
- Hands-on experience with frameworks-Bootstrap, Tailwind CSS and proficient use of Javascript.

Java Software Developer Intern at Infosys Foundation

Jul 2025 – Aug 2025

- Developed and maintained Java-based applications using Spring Boot framework.
- Collaborated with the development team to design, test, and deploy RESTful APIs and database-driven modules.
- Wrote clean, efficient, and well-documented code following OOP principles and version control using Git.
- Assisted in front-end integration using HTML, CSS, and JavaScript (full-stack exposure).

PROJECTS

Project Management Application (PRO-MAN) | MERN Stack

- Developed an user-friendly application to manage the tasks during a project using HTML, CSS, JS, DBMS and API's.
- Created interactive and responsive user interface using Bootstrap and tailwind frameworks.
- Completed the project in period of six-weeks as a part of the internship in collaboration with EY Global delivery services.

Movie Recommendation System

- Designed and developed RESTful APIs in Spring Boot for user management, movie data, and recommendations.
- Integrated a machine learning model (collaborative filtering / content-based filtering) using Python for movie suggestions.
- Built an interactive frontend with React.js for real-time movie search, ratings, and reviews.
- Managed and optimized data storage using MySQL, ensuring efficient queries and scalability.

E-commerce sales Data Analysis

- Imported and cleaned large datasets using dplyr and tidyverse packages.
- Performed exploratory data analysis (EDA) to find sales patterns by region, product category, and customer segment.
- Conducted data visualization using ggplot2 to present revenue trends, top-selling products, and seasonal variations.
- Identified performance statistics and provided data-driven recommendations for marketing and inventory strategies.

CERTIFICATES

- [EY Global Delivery Services & AICTE](#) - Internship completion as MERN stack developer.
- **Infosys Foundation (ICT academy)** – Java Software Developer Intern.
